

Custom Food

We have custom foods here at violets! Each food can be obtained either through buying them with in-game money from the custom food npc or through crafting them. These foods grant you different special effects alongside saturation and food. Below you can see two example foods.

How do I craft custom foods?

All custom foods are craftable, however, the recipes are there for players to discover! This is a chance for you to work together with your team, friends or ask others within the community on how to craft these items. Seasonally, there are even easter eggs added into the custom foods.

Note: Unfortunately, bedrock players are unable to craft custom foods due to plugin limitations.

Revision #5
